Basic Printing Methods (Windows)

Printing is performed from the application used to create the document you wish to print. The basic procedure is described below.

Turn on the printer, and load the paper.

∠ **3** "Attaching the Roll Paper Adapter" on page 29

∠͡͡͡͡͡͡͡͡͡͡͡͡͡͡͡͡͡͡͡͡͡͡ː Cut Sheets" on page 39

∠̄͡͡͡͡͡͡͡͡͡͡͡͡͡͡͡͡͡͡͡͡͡͡ Con page 41

When you have created the data, click **Print** in the **File** menu.

3 After confirming that the printer is selected, click **Printer properties** or **Properties** to display the Printer Settings tab.

- 4
- Check the options selected for Media Settings.

When using T7270/T5270/T3270

On startup, the printer driver automatically downloads information on the media in the printer and displays it in the **Media Settings** area.

To print at current settings, proceed to the next step.

When using T7270D/T5270D

If **Roll Auto** - ****mm** has been selected when the printer driver starts, the printer applies the media type and width of the roll paper currently in use on the printer. When the printer starts printing, it switches to the roll paper to be printed in accordance with the **Roll Switch Condition** setting in the Setup menu of the printer.

6

∠ Switching Roll Paper Automatically before Printing (T7270D/T5270D Only)" on page 93

If the desired settings are not displayed, replace the media in the printer with the desired paper type and click the **Acquire Info** button. The driver will reacquire data from the printer and update the information displayed in the **Media Settings** area.

Note:

If the **Acquire Info** *button is clicked, information about the paper loaded on the printer is displayed.*

5 In the Size Settings area, choose the desired Paper Size.

Choose the **Paper Size** selected when the document was created in the application.

Advanced fit and borderless settings are available in the Layout tab.

∠ T "Enlargements and Horizontal and Vertical Banners" on page 86

∠ "Borderless Printing" on page 98

7

Choose an option according to the type of document and how it will be used.

To choose a color correction method or adjust colors, select **Advanced Settings**.

∠ Correct color and print" on page 103

Check settings.

8

9

The selected settings are reflected in the area on the right; check that settings are correct.

Click the **OK** button.

10 When settings are complete, click **Print**.

The progress bar is displayed, and printing starts.

Screen while printing

The following screen is displayed when you start printing, and the progress bar (the computer's processing status) is displayed. On this screen you can check the remaining ink level, product numbers for the ink cartridges, and so on.

An error message is displayed if an error occurs or an ink cartridge needs replacing while printing.

Printable area

This section describes the printable areas for the printer.

If the margin set in an application is larger than the following setting values, sections beyond the specified margins are not printed. For example, if 15 mm is selected for the left and right margins in the printer menus and the document fills the page, the 15 mm at the left and right sides of the page will not be printed.

Roll Paper Printable Area

The gray area in the illustration below shows the printable area.

When printing borderless on the left and right, the left and right margins are 0 mm. When printing borderless on all edges, all margins are 0 mm.

The arrow in the illustration indicates the direction of the ejected paper.

- *1 T7270/T7270D
- *2 T5270/T5270D

*3 T3270

*4 If **Banner** is selected for **Roll Paper Option** in the printer driver **Advanced** tab, the top and bottom margins are 0 mm.

Margins for roll paper depend on the option selected for **Roll Paper Margin** in the menus, as shown in the table below. Roll Paper Margin Settings (37 "Setup menu" on page 147

indicates factory default settings.

Roll Paper Margin Parameter	Margin Values
Normal	A,C=15 mm [*]
	B,D=3 mm
Top15mm/Bottom15mm	A,C=15 mm
	B,D=3 mm
Top35mm/Bottom15mm	A=35 mm
	C=15 mm
	B,D=3 mm
Top45mm/Bottom15mm	A=45 mm
	C=15 mm
	B,D=3 mm
3 mm	A,B,C,D=3 mm
15 mm	A,B,C,D=15 mm

When **Normal** is selected, the value for A is 20 mm for the following paper.

Premium Photo Paper Glossy (250)/Premium Photo Paper Semigloss (250)/Ultra Premium Photo Paper Luster (260)/Premium Semimatte Photo Paper (260)

When the following media are used in **CAD / Line Drawing** mode, the value for AC is 3 mm.

Singleweight Matte Paper

Important:

Printing is distorted when the trailing edge of the roll paper comes off the core. Make sure the trailing edge does not come inside the printing area.

□ The print size does not change even when the margins are changed.

Cut Sheets Printable Area

When printing borderless on the left and right, the left and right margins are 0 mm. (Borderless printing is not available with poster board.) The arrow in the illustration indicates the direction of the ejected paper.

*1 T7270/T7270D

*2 T5270/T5270D

*3 T3270

Using the Power Off Timer

The printer offers the following two power management options.

□ Sleep mode

The printer enters sleep mode when there are no errors, no print jobs being received, and no control panel or other operations performed. When the printer enters sleep mode, the control panel's screen turns off and the internal motors and other parts switch off to consume less power.

Sleep mode is cleared if a print job is received or a button on the control panel is pressed.

The delay before the printer enters sleep mode can be selected from values between 5 and 210 minutes. At default settings, the printer enters sleep mode if no operations are performed for 15 minutes. The delay can be changed from the Setup menu. Setup menu" on page 147

Note:

When the printer enters sleep mode, the control panel's screen goes blank as if the power has been turned off, but the \circlearrowright light remains lit.

Dever Off Timer

The printer is equipped with a Power Off Timer option that automatically turns the printer off if no errors occur, no print jobs are received, and no control panel or other operations are performed for a set period of time. The delay before the printer turns off automatically can be selected from values between 1 and 24 hours in increments of 1 hour.

This section shows the default settings.

□ T7270/T5270/T3270

The printer turns off automatically if no errors occur, no print jobs are received, and no operations on the panel or other operations are performed for eight hours or longer.

□ T7270D/T5270D
