

► **Scroll Pumps**

**Applications**

**XDS-C:**

- Ideal for wet chemistry filtration and general lab applications
- 3-position gas ballast selector enables pumping in excess of 200 grams per hour of water vapor
- Used to back hybrid turbo pumps with a foreline pressure tolerance well above 1 Torr

**XDS:**

- For roughing chambers prior to cryopumping
- For backing normal turbo and hybrid turbo pumps
- General rough pumping applications in clean (non-corrosive) conditions
